Contribution Statement

Forecasting Cabai Rawit Merah Prices, 7 Working Days Ahead, Six Indonesian Provinces
Course: Predictive Analytics, Group Project

Group Members

Role	Name	NIM
Leader	Fajar Dwiharjo	24130500010
Member	Taufiqurrahman	24130500005
Member	Yeni Nur Arwanti	24110500011

Collaborative Work

The data quality assessment, exploratory data analysis, feature engineering, model development, validation design, hyperparameter tuning, results interpretation, and the business recommendation were carried out together as a group, through shared discussion and joint review at each stage. All three members contributed to and agreed on the analytical choices documented in the notebook and presentation materials, including the proposals flagged for sign off and the final decisions reached on them.

Individual Responsibility

Member	Responsibility
Taufiqurrahman	Joint analysis and discussion as described above, plus data collection: sourcing, fetching, and maintaining the PIHPS price, Open-Meteo weather, and BBM Solar price pipelines used as the project's dataset
Fajar Dwiharjo	Joint analysis and discussion as described above, plus group leader: coordination of the group's work and sign off on the analysis
Yeni Nur Arwanti	Joint analysis and discussion as described above

Declaration

All members confirm that the analysis, findings, and recommendations in this submission reflect the group's collective work and were discussed and agreed upon together.
